elevation of privilege

A Threat Modeling Card Game for Developers

The Elevation of Privilage card game helps you quickly and easily find threats to software or computer systems.

Until now, considering a bunch of possible attacks may have seemed hard to wrap your head around. EoP helps keep you focused on identifying attacks with a 7 seven threat framework: Spoofing, Tampering, Repudiation, Information Disclosure, Denial of Service, Elevation of Privilege and Privacy.

Because EoP uses a simple point system, you can challenge other developers and become your opponent's biggest threat.
